SoftEagle Professional 6.5.0.5 update for the latest version of SoftEagle, download SoftEagle Professional 6.5.0.5 patch file from the links given below and install.## General Information ## Description Some applications have user controls that can't be dropped onto a window. For example, some business applications allow the user to drop an [ADO.NET data connection](/dotnet/framework/data/adonet/data-net-data-connections-and-datareaders-dataset-programmatically-how-to-program-an-ado-net-connection-as-a-datareader-to-your-database-programmatically) on the form to import data into the application. Often, these user controls must be dropped into the [ServerForm](/visualstudio/ide/reference/msgs/serverform) before the form is displayed. To allow the user to drop controls on the [ServerForm](/visualstudio/ide/reference/msgs/serverform), use the following steps. - [Step 1: Declare a ClientControl](/visualstudio/ide/reference/msgs/clientcontrol-declare-serverform) for each control. For example: ``vb Private _MyUserControl As New ClientControl() With { _ .ClientName = "MyControl", _ .Width = 50, _ .Height = 50 _ } `` - [Step 2: Drop the control on the ServerForm](/visualstudio/ide/reference/msgs/serverform) when the form is displayed, and [assign the control](/visualstudio/ide/reference/msgs/assigncontrol) to a [ClientControl](/ 82157476af
